No access to my account. Udemey has a different email, and not the email I signed on into my account which is also my email.No response from themhoping to get a quick response thru your site! Thank you!Date of experience: June 01, 2025I've purchased several courses on Udemey, hoping to improve my skills, but overall I haven't been satisfied with the quality. Recently, I bought another course where the tutor clearly mentioned a 30-day money-back guarantee, no questions asked. However, once I reached around 40% of the course, I found that the instructor mostly just showed code with minimal explanation. I couldn't understand the concepts and felt it wasn't worth continuing.When I requested a refund so I could try a different course, Udemey rejected it, stating I had already watched too muchdespite the clear promise of a no questions asked refund. This was very disappointing.I've had similar issues with other courses too. The content often doesn't meet expectations, and the teaching style is not beginner-friendly. I expected more consistency in quality and better support when something doesn't work out. Im now hesitant to invest in more Udemey courses.Date of experience: July 16, 2025Im extremely disappointed with my recent experience with Udemey.My son, a student with no current income, signed up for their monthly subscription and was charged 27/month. The only alternative offered was 22/month if he committed to an annual plan costing 264. This is completely inconsistent with the pricing advertised on their website - which clearly states an annual plan is \$144/year (\$12/month). I have emailed them multiple times, and despite raising this issue politely and clearly, I have received no response whatsoever.As the person paying for the subscription, I feel deceived by this pricing structure and let down by their lack of accountability. For a company that markets itself as an accessible online education platform, this experience has been a huge letdown.I will no longer recommend Udemey to anyone and will be actively exploring alternative platforms with fairer pricing and better customer care.Date of experience: July 09, 2025Dont bank on it waste of time, paid for a course and nothing like what I expected poor quality material and they refused to give me my refund. I would never recommend it to anyone Date of experience: July 11, 2025Lately, many instructors including long-time contributors with well-rated courses have reported sudden course removals from Udemey without clear explanation or warning. In some cases, content was flagged for low quality or minimal human involvement, even when instructors provided strong evidence of original, manually created materials.This appears to be part of a broader internal clean-up process, but its happening with little transparency, no clear appeals process, and sometimes even mistaken course attributions. For creators who rely on Udemey as a full-time income source, this has been devastating.Its a worrying sign for the instructor community. If youre considering building your livelihood on Udemey, proceed with caution your content can be taken down without much recourse.Date of experience: July 09, 2025Courses are dreadful. Course descriptions are fake and are not what is delivered on the course, so it's impossible to even find a course that could be suitable to what you actually searched and filtered for. Free courses appear as just a plug for a particular piece of software, something which they don't tell you anywhere in the course description. Customer support is abominable - staffed by incompetent individuals who either can't, or refuse, to understand basic English and the questions being put to them. Requests for manager intervention are ignored and they have no complaints procedure at all. Date of experience: July 06, 2025Udemey.com has truly transformed the way I learn new skills! With a wide range of affordable courses, it's perfect for students, professionals, or anyone looking to grow. I especially love the lifetime access to contenteven after completing a course, I can revisit lessons anytime I need a refresher.The instructors are knowledgeable, and many courses offer hands-on projects, quizzes, and certificates of completion. The user interface is clean and easy to navigate, whether Im using it on my phone or laptop.What I appreciate the most is the flexibilityUdemey lets me learn at my own pace, anytime, anywhere. Whether its tech, personal development, business, or creative skills, theres always something new to explore.Highly recommend it for anyone serious about learning and self-improvement!Date of experience: June 05, 2025Ill change my review if yall fix this, but this is the 3rd time that Ive tried to buy a course on your site, and it hasnt worked. I have no issues buying on amazon, or any other site - just yours. I want ways to improve my Spanish, but for some reason I always get an error message when trying to buy the course. That makes your site seem more like a scam, to be honest. Date of experience: July 02, 2025I was quite happy until all my paid courses disappeared = waste of money!Stay away - its fraud.Date of experience: June 30, 2025Honestly, the video playback is incredibly slow. Its hard to believe how unresponsive and unpolished the platform feels. Sometimes it takes almost 30 minutes just to load a previous lecture super frustrating.On top of that, theyve disabled basic keyboard controls like pause and play, which makes the experience even worse. Feels like theyre not even thinking about the user at all.Really disappointing.Date of experience: June 29, 2025Courses are okay but be aware if you don't like the course they will provide a credit and NOT a refund. I also think their advertising is false as courses are always on sale so the full price is not really what they plan to sell it for. Date of experience: June 15, 2025 Udemey has change the way to login via 6 digit code instead my password and is impossible to login. This 6 digit code came after a lot of time and cannot use them. After a time the code didn't come at all, today I tried an our to login without succes. I paid for this courses and I am not allowed to see them. This is real burglar behavior. I know it will be time consuming for me but I will take legal action against Udemey.Date of experience: June 27, 2025Customer Care at Udemey has really gone downhill. Udemey sent me an email offering me 80% discount on certain courses. I put 3 of these courses in my Cart. I applied their supplied Promo Code. And the discount ended up being 61%. I used their new Contact button. And got a series of useless questions by a remote assistant, getting nowhere. Eventually, I was connected to a real person who could give me no useful advice. Obviously, there is a technical fault but Udemey could do nothing to rectify it.They have a new system, trying to save money, no doubt. And by the way, I tried to make a complaint to them but this is also impossible to do.Date of experience: June 27, 2025I purchased a course on Udemey called "The Complete IELTS Course (General) | Band 7+ | 2024 Update", but I found it wasn't suitable for my current level.I only watched about 3% of the content, and Im still within the 30-day refund period. However, the platform wont allow me to request a refund, and Ive tried everything the chatbot doesnt help, theres no human support, and even my email to udemey.com has been ignored so far.I also reached out via Twitter and received no response.This experience has been frustrating, especially when trying to get help before the refund window closes. I hope Udemey will see this and resolve the issue by issuing a refund.All I want is fair treatment and a proper response.Date of experience: June 12, 2025The core component, the video player does not properly render the videos, often buffers and is a waste of time for learning purposes. There is no function to select video quality on mobile. Generally I have had a bad experience trying to learn with Udemey. More frustrating is, this issue appears to have been going on for years, according to comment in social media threads and stuff. Don't pay for faulty and unfinished software.Date of experience: June 20, 2025I sincerely wish I could post photos on here, to show the incredibly unfair use of Dynamic Pricing on the Udemey website. Depending on "how" you reach the Udemey defines the pricing you'll see. This morning, I was just comparing the Home screen prices. "The Complete AI Guide" was priced at \$70 via a cashback website, \$40 via an Incognito window, and sometimes as low as \$20 if you get a "New member" button.Bottom line: if you're using Udemey, and the course price is over \$20, you're being ripped off. Thank you for being a customer. Try going onto the website using a different browser / window, and see the price difference.(Sigh...)Date of experience: June 17, 2025No transparency about sales and price the real income is for them. Date of experience: June 12, 2025I purchased a training course from them. They have disabled my ID without providing an adequate explanation as to why they have done it. This has removed my access to the training, and they will not provide a refund or any other remediation option. They took my money and ran.Date of experience: June 06, 2025There are much better alternatives. Youtube and Coursea are free for example. Paid ones like Skillshare and MasterClass are simply better. Horrible experience on the site really. Only use it because I have some overpaid courses on it.Date of experience: June 10, 2025I've taken some great courses here!Like most places, you have to check on the course reviews, look at some of the previous lessons and see if it's giving you what you're looking for. Ive been very pleased with the some of the instructors of the course that I purchased and it's helped me a lot with my career staying up to date with current techniques and software.Date of experience: June 09, 2025 VMware Certified Professional (VCP) certifications are designed for IT professionals to support VMware infrastructure and related products.
