Wondering how Fire TV Stick Lite differs from Fire TV Stick? Amazon's streaming devices are so similar they're almost identical — with a few key differences. The relatively new streaming sticks excel in performance, simple design, and great features — making them contenders for our list of the best streaming devices. Once Amazon rolls out the new Fire TV OS to all of its users, they should be even better. The new Fire TV interface finally includes custom user profiles and a redesigned home screen. Interestingly, all of these devices differ less inside the bar itself than in the included remotes - although there is a noticeable difference in sound quality between them. Here's a closer look at Fire TV Stick Lite versus Fire TV Stick, with the goal of finding the right streaming stick. 2020) Picture quality 1080p Full HD (HDR, HDR10+, HLG) 1080p Full HD (HDR, HDR10, HDR10+, HLG) Sound quality Dolby audio via HDM Pass-Through Dolby Atmos Remote Alexa Voice Remote Lite (without TV control) Alexa Voice Remote Price \$29.99 \$39.99 Memory 8GB E8 Processor Quad-core 1.7GHz Quad-core 1.7GHz Comes with 2 AAA batteries, HDMI extension cable, USB cable and power adapter, 2 AAA batteries Alexa Voice Remote Lite , HDMI extension cable, USB cable and power supply, Alexa Voice Remote Today's Best Deals Amazon Fire Stick Lite (Opens in a new tab) (Opens in a new tab) (Opens in a new tab) \$29.99 (Opens in new tab) View (opens in new open tab) (opens in new tab) (opens in new tab) Watch (opens in new tab) (opens in new tab) (opens in new tab) Watch (will open in a new tab) Fire TV Stick Lite vs. Fire TV Stick: Price and Value It's simple. Winner: Fire TV Stick LiteFire TV Stick Lite vs. Fire TV Stick: Design. You might have to squint here... but not the sticks themselves. The Fire TV Stick Lite and Fire TV Stick share the same design at 3.4 x 1.2 x 0.5 inches and weigh 1.1 ounces (Image credit: Amazon). The Fire TV Stick Lite and Fire TV Stick 2020 also connect to your TV in the same way via an internal HDMI port, although Amazon includes an HDMI extender if you have trouble accessing the ports on the back of the TV. . are part of the Amazon Climate Pledge Friendly project. The initiative is part of the company's announcement of its "commitment to zero carbon across our entire business by 2040." Winner: TieFire TV Stick Lite vs. Fire TV Stick: Remote. on its remote is a regular Fire TV Stick. The Fire TV Stick Lite Alexa Remote Lite lacks some of the buttons that make the regular Alexa Remote for Fire TV more functional. (Image credit: Amazon). Specifically, the regular Alexa Remote has TV controls (top right).) and volume (up, down and mute, below all other buttons). The only button missing from the Alexa Remote Lite is the Guide button, which opens the Live TV Guide. This can be annoying for anyone who wants to use just one remote instead of juggling one for their TV and Alexa Remote. Light. But that may not bother those who choose the Amazon Fire app on their phone as a digital remote control. Alexaalso perform these functions, but I don't always want to talk to my remote when I'm watching TV, and I doubt I'm the only one. Winner: Fire TV Stick 2020, Fire TV Stick Lite vs. Fire TV Stick: Streaming Quality Both the Fire TV Stick Lite and Fire TV Stick 2020 offer one of the most important features when it comes to TV streaming: Full HD 1080p video output. Both flash drives also support HDR, HDR 10, HDR10+ and HLG video standards. The only difference under the hood is the sound. The Fire TV Stick 2020 has Dolby Atmos audio, while the Fire TV Stick Lite only has Dolby audio and only HDMI pass-through. (Image credit: Amazon) The difference between the two is the immersive sound. Dolby Atmos extracts the sound from your TV and AV equipment in a special way, creating a surround sound experience. In Dolby's own words, it offers "multi-dimensional sound with incredible clarity that surrounds you." We're betting that people with their own multi-channel home stereo system are more likely to see the difference. Dolby Audio is less impressive, focusing on delivering rich and powerful sound quality. It also works with surround sound devices, but Dolby doesn't try to achieve the same level of immersion. Winner: Fire TV Stick 2020 Fire TV Stick Lite vs. Fire TV Stick: Performance While we haven't tested Fire TV Stick Lite or Fire TV Stick yet, we're still undecided in this category. Amazon rates these controllers for the same performance and power savings, with 50% faster speeds and 50% lower power consumption (both compared to the previous Fire TV Stick). This makes sense since both run on Quad Core 1.7. GHz processors (same chip as in Fire TV Stick 4K). Both also have 8 GB of storage space. Should one of these Fire Sticks prove surprisingly faster than the other, we'll update this duel accordingly. Winner: TieFire TV Stick Lite vs. Fire TV Stick: Outlook On paper, it seems like the Fire TV Stick Lite is probably best for most people. For those who want to limitControllers in your living room or better sound quality might disagree, but the \$10 lower price makes it even more affordable for consumers (and we wouldn't be surprised if it gets cheaper this holiday season). While I personally prefer the Fire TV Stick's volume and power buttons, it's hard to argue that it costs \$10. When both Fire TV Sticks share the same processor, memory, and video quality, it's not hard to see why many choose to save money and buy the cheaper Fire TV Stick. In any case, once we test the Fire TV Stick Lite and Fire TV Stick, we'll update this story accordingly and ensure a convincing ending to this confrontation. Need a VPN on the Fire Stick? Both the Amazon Fire TV Stick Lite and the regular model allow you to search, install apps or access a TV channel. The main difference of ten euros between one model and another lies in the team accompanying the device. One of them gives us much more control over what we watch on TV, while the other doesn't. As we can see in the pictures, the Amazon Fire TV Stick Lite controller has a microphone button at the top, a control wheel and several buttons in the middle: back, main menu, forward, play and pause, back. And that's all Amazon Fire TV Stick remote control for us makes a big difference in controlling TV playback. What is the difference? There are a few more buttons than the previous remote. The remote has a button on the top to turn it on or off (it doesn't seem to turn the other one on), and in the middle are the TV controls: volume up or down, mute button. Also, it has several labels on the buttons at the bottom. In this case, and this is one of the main differences between the models, we can use a dedicated button for Netflix, a dedicated button for Amazon Prime Video, a button for Disney Plus and another one for access.Music by Dau Sadness. That is the difference. We can hold down the button and ask Alexa to search for what we want.
