Carnival Celebrations around the world

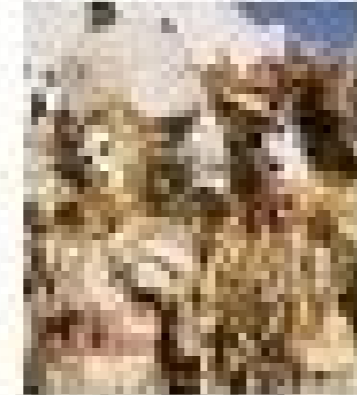

Nowadays, Carnival is a popular and established phenomenon with different traditions around the world. The Carnival celebrations are an excellent of tradition and joy that engulfs locals while providing spectacular entertainment for those lucky enough to attend the party.

Carnivals vary around the world, especially in places that have strong Catholic or Orthodox religious traditions. The idea has always been to get your heading and parading out of the way, before the important 40-day Lenten season begins on Ash Wednesday. But Carnival dates back to prehistoric times and has also served as a way for the underclass to escape from their daily struggles and express their discontent with the status quo. Carnival clothing, games, and foods can be found at many Carnival celebrations, it's no wonder that *repressive regimes* tried to discourage or ban carnivals altogether. Carnivals can be seen as a form of a short *revolution* against any form of *oppression*, since people are allowed to do things that are forbidden in real life, even the carnival king is not really a symbol of power since you can joke about him. It's a way to express irony and criticism of power in a festive way. Carnivals can vary widely depending on the region where they are celebrated, in this text we will have a look at the world's top 10 carnivals:

1. Tenerife Carnival

The festival of the sun in Tenerife starts in January and can last up to a month. The locals take their partying very seriously indeed, the Queen of the Carnival is crowned on the final day while in between there are parades, dances, concerts, fireworks and lots of people in *elaborate costumes*. Every year more than half a million people travel to Tenerife to join in the party that concludes with a 24-hour party during which carnival goes off fire to a giant paper skyline.

2. Venice Carnival, Italy

Venetians have more to the imagination when celebrating Carnival. In one of Europe's most extravagant and elegant events, the Venetians choose to wear elaborate dresses and beautiful painterly masks keeping the whole to catch a very classy and refined affair. There may be much fancy dress and the suggestion of wild private parties but being Venice, it's really all very civilized. Venice's masquerade ball is called the Gran Ballo della Maschera.

3. Rio de Janeiro Carnival, Brazil

The mother of all Carnivals and an absolute bucket list must see, the crazy Rio celebrations take over the city with samba, colour, heat, fun and lots of fun. Daily dances float their way in the most colourful costumes and the festival costumes of any carnival is a masterpiece of the Sambadrome, in which the city's samba schools compete and show their skills.

4. Mardi Gras, New Orleans, USA

The holiday of Mardi Gras is celebrated in Southern Louisiana, although celebrations are concentrated for about two weeks before and through Shrove Tuesday, the day before Ash Wednesday. There are many parades with floats and costumed people but the essence of the festival is revelers getting totally merry on rum or bourbon. The largest and most elaborate parades take place the last five days of the Mardi-Gras season. In the final week, many events occur throughout New Orleans and surrounding communities, including parades and masquerade balls.

5. Cadiz Carnival, Spain

Every February the ancient Andalusian city of Cadiz is transformed into one of Europe's top party destinations as the annual Carnival celebrations come to town. The carnival goes of the Cadiz Carnival, are known for their wit and sense of fun, they don't just dress up, they also sing satirical songs. They even have a song called 'In Teatro Falls'.

6. Oosters Carnival, Bonaire

I have also given you some key vocabulary to help your understanding. Lesson by Caroline Devane Key Words Braggart - the person who boasts. Conceited - excessively proud of yourself. Cocky - similar to conceited. Thinking very highly of yourself. Bragging - to boast about achievements or possessions. Champion Yourself At Work If you're a younger employee, you've no doubt run up against the struggle of getting noticed for your work. One of the biggest battles in the workplace is getting recognition for the work you do without coming across as boastful or a braggart. Even older, seasoned workers have to fight to get their work recognised. The truth is, however, that you have lots of opportunities to champion yourself at work and point out your victories: in meetings, presentations and even company-wide e-mails. However, it's a fine line to walk; there's a definite art involved in the subtleties of touting your accomplishments. If you're always talking about how good you are at your job and how lucky the company is to have you, you'll come across as conceited, or even just as an idiot. But speak too little of your work, and you could miss out on assignments, raises, promotions, and your own private jet. OK, maybe not the last one, but if you want to take your career to the next level, you need to champion yourself at work. Focus On Specifics The first rule of championing yourself at work is to have something worth crowing about. You need a particular achievement, because going around telling people you're great for no reason at all makes you sound full of yourself. You should always have something specific, and it should be measurable. Measurements are a sure way to show change, improvement in an area that was weak, etc. There's a saying in business: "If you can't measure it, you can't manage it." We know, we know; things like your team's morale are important too, but the fact is your boss, your boss' boss and everyone else has a preference for numbers. Why? Numbers are an easy handle. Your boss could spend a few hours a week sitting in on the sales team, watching how many deals are made, and the overall mood of the division. Or, he could read the sales figures for the month, and the number of employees who've quit this year versus last. As a busy man, which do you think he's more likely to do? Exactly. Present Accomplishments As Company Victories, Not Your Own When you achieve the result you've aimed for, you truly have something to brag about. However, if you play that victory off the wrong way you'll come across as cocky. So instead of going around bragging about what a fine job you did, share with the others around you how proud they should be of the success the company had. Do what you can to share the praise: It makes you look like a bigger man and nobody will be confused about who actually made the win possible. Be Persistent Have you ever had a question for your boss or something to get their feedback on and felt brushed off by them? You may have even felt unimportant or unappreciated to them. Well, barring the few truly bad bosses out there, most bosses care about their teams a great deal. Your boss doesn't mean to ignore you, he's just busy. Get a promotion to management, and you'll quickly realise how much work your boss was dealing with that you weren't even aware of. They have people above them to answer to, their own work and, last but not least, you and your coworkers on the level below. So don't feel bad if you get a lukewarm reception from your boss -- you may have caught them at a bad time. Keep bringing up the good things you're accomplishing. Don't give up, and keep reminding your boss of your past accomplishments and the big projects you're currently facing. To read the full article visit Now answer these true or false questions: Finish! Close The idea that you either read for pleasure or for learning is misleading. It is, of course, possible to do both. Still, you shouldn't necessarily approach academic reading the same way you approach a beach read. In order to read and comprehend a book or article for school, you need to be much more intentional and strategic. In most reading tests, the student is asked to read a passage and predict what might happen next. Prediction is a common reading comprehension strategy. The purpose of this strategy is to make sure you're able to infer information from the clues in the text. Here's a passage to clarify this point: Clara gripped the handle of the heavy glass pitcher and lifted it from the refrigerator shelf. She didn't understand why her mother thought she was too young to pour her own juice. As she backed away carefully, the rubber seal of the refrigerator door caught the lip of the glass pitcher, which caused the slippery handle to slip from her hand. As she watched the pitcher crash into a thousand pieces, she saw the figure of her mother appear in the kitchen doorway. What do you think will happen next? We could infer that Clara's mother reacts angrily, or we might guess that the mother bursts into laughter. Either answer would be sufficient since we have so little information to go on. But if I told you that this passage was an excerpt from a thriller, that fact might impact your answer. Similarly, if I told you this passage came from a comedy, you'd make a very different prediction. It is important to know something about the type of text you're reading, whether it is a nonfiction or a work of fiction. Understanding the genre of a book helps you make predictions about the action—which helps you comprehend it. Any time you read for the sake of learning, you should be reading actively. To do this, you'll need some extra tools. For example, you can use a pencil to make annotations in the margins of your text without doing any permanent damage to the book. Another good tool for active reading is a pack of sticky notes. Use your notes to jot down thoughts, impressions, predictions, and questions as you read. A highlighter, on the other hand, is usually not as effective. Highlighting is a relatively passive act when compared to note-taking even though it may seem like you are engaging with the text by highlighting it. However, highlighting during a first read can be a good way to mark passages that you want to revisit. But if a passage impresses you enough to highlight it, you should always indicate why it impresses you, whether on the first or second read. It's a no-brainer that you should take the time to look up new and unfamiliar words as you read. But it's important to make a log book of those new words, and revisit them long after you've finished reading that book. The more we study a subject, the more it sinks in. Be sure to keep a log book of new words and visit it often. The title is often the last thing to be adjusted once a writer has finished writing. Therefore, it may be a good idea to consider the title a final step after reading. A writer will labor hard and long on an article or book, and often the writer uses many of the same strategies that a good reader uses. Writers edit the text and identify themes, make predictions, and annotate. Many writers are surprised by the twists and turns that come from the creative process. Once a text is completed, the writer may reflect on the true message or purpose as a final step and come up with a new title. This means you can use the title as a clue to help you understand the message or purpose of your text, after you've had some time to soak it all in.
