Setlist Helper and Song Book give musicians and performers an easy way to organize songs and lyrics into setlists for performances or practice. Change your songbook by putting all the lyrics in the Setlist Helper. This app is perfect for musicians, religious organizations, professional speakers, concert goers, etc. This app is an add-on to where you can create a free account and sync all your playlists, songs and lyrics. You can also download songs from a spreadsheet and import them to get started quickly. There are 3 versions of Setlist Assistant available below. You can purchase premium versions within the app. Free version - PDF viewer in sheet music app. - Text search - Support for Airturn pedals - Easy to sort songs in the setlist by dragging. - Insert breaks into your set list as you can play more than 1 set. - Sync songs and setlists with www.setlisthelper.com. - Chord Pro format support for lyrics. - Include mp3 files in songs you want to practice or play. - Add sheet music or text documents (PDF, DOC, PPT or RTF) to a song - Use Dropbox to import lyrics and documents. Setlist Only Version This is for users who create and organize setlists and don't care about lyrics. Includes all free features plus: - Share setlists via email, Facebook, others... - No ads. - Searching for songs. - Full song information is displayed in the set list. - Statistics on total units and total time. - Copying setlists used in previous concerts. Setlist and lyrics version for musicians who want to manage their lyrics through the app. It has all the set list help features listed above, plus the following features: - Swipe to easily move through the lyrics in the playlist; - keep the screen on when the lyrics are displayed; - save compression settings to zoom lyrics display for future use. - Autoscroll lyrics - Keep autoscroll lyrics speed - Insert chord markers with lyrics. - Sorting and filtering songs. - Transpose - Metronome upgrade requirements are highly recommended. If you have any questions or comments, please email us at support@setlisthelper.com. Publisher www.setlisthelper.com Release Date April 27, 2022 Languages English Category Audio & Media Subcategory Audio Files Players Operating System Android File Size 38.80 MB Total Downloads 3346 License Model Free Price N/A Here is the changelog for setlist Helper and Book of songs with publication date on our website 03.04.2014. The latest version 4.36 was updated on soft112.com on September 1, 2022. See below for changes in each version: Version 4.36 - Added ability to pause sound when exiting a song. in the "Actions" section. This makes the audio player work as it did in version 4.33. - Fixed Dropbox crash when importing songs. Version 4.33 Audio player allows you to select another song during playback. - Updated PDF viewer. I hope this fixes the PDF crashes. I cannot reproduce the problem. Please let me know if it is fixed. - Fixed double space issues during sync. - Added unlink button to Dropbox file browser. This will allow you to reconnect Dropbox or sign in to a different account. Version 4.32 - Fixed sync not updating setlist when adding songs from playlist. - Fixed an issue where chords would move to the left after syncing. - If you use the back button to exit the application, you will be prompted before the presence. Version 4.31 - Fixed ability to change track name. - Fixed problem with backup database import. - Fixed problem adding Dropbox files. Version 4.30 - Improved purchase functionality. Your purchase will be recognized when you start the app. - Added scrolling speed sync when adding text. You may need to adjust the scrolling speed again to sync them. - Improved text search. Text search can be updated without creating a new issue. - Fixed user registration syncing after successful registration. - Fixed crash when loading Dropbox browser. Version 4.24 - Fixed a sync issue where not all songs were added to the setlist. Opening lyrics in split screen does not stop media playing in another app. - Playing audio in another app in split screen stops auto scrolling. Version 4.24 - Fixed broken search in song catalog selection. - Fixed issue where full texts were not fetched on google.com. - 3-dot menu setlist songs were not visible in dark mode. Version 4.21 - Fixed a crash when opening PDF files. - Full screen mode when PDF works with one touch. - Fixed the sound starting at the wrong position. Version 4.20 - Sound player runs as a service. This allows you to play audio when the app is in the foreground. - Updated PDF viewer. This should fix the crash related to PDF files. - Fixed text search. Text search performance should also be improved. Version 4.17 - Fixed a problem with opening documents such as PDF files. For more information see Version 4.17 - Google.com text search has been fixed so you can jump to search results. For more information see Version 4.15 - Fixed opening documents in external applications. For example, open Word documents from the playlist in Word Viewer. - We are working on importing from internal SD card only on Android 10. Use Dropbox import we recommend instead of importing from SD card to view files on multiple devices. See for more information. Version 4.14 - Fixed Dropbox import after it was broken in version 4.13. Previously the import limit was 500. Now you can import an entire folder. - Fixed Dropbox file viewer to display more than 500 files. - Fixed transposition issues. - Transpose changes H chords in German notation. However, Bb = B is not implemented. If you need, write to the support department. More information is available at Version 4.13 - Fixed hang issues when autoscroll does not work. - Fixed Sync login issue where password didn't work with special characters. - Fixed importing documents using Dropbox on Android 10. - Fixed text search dialog not showing save button. - Added option in Preferences to disable text search prompt. - If you have trouble finding the text, find this option at the bottom of the textSettings and turn it off. For more information, see Version 4.10 - Fixed text search issue for older Android versions. This fixes the white screen. - Fixed problems with lyrics search when combining lyrics from Google Words. - Added conversion to chord pro in text edit page. More info at Version 4.09 - Fixed issues with sticky chords when searching for text. More info at Version 4.08 - Text search asks for song title and artist name. This will allow you to import the found text, but not the song title or artist. - Added "Add to Playlist" menu item when clicking the circle next to a song. - Added "Add to Tag" menu item when clicking the circle next to a song. For more information please visit Version 4.07 - Metronome will not show on breaks or when the tempo is 0. - Fixed highlight color not being saved. - Added GuitarParty.com, pesmarica.rs, cifraclub.com.br and zakordi.net lyrics search. - Added another field in the settings to be displayed in the track list. - Fixed pause message not appearing after exiting a song. See for more information. Version 4.06 - Fixed issues with opening a document when the document is on an external SD card. - Fixed issues where the Share option in the text menu was not working. Version 4.05 - Added ability to perform play button actions on bluetooth pedal. - Added Airturn 6 Bluetooth pedal support. For more information, please visit Version 3.78 - Fixed an issue importing Dropbox files. - Fixed a bug where the bluetooth pedal did not scroll to the bottom of the page. - Reduced scrolling speed on smaller devices. Version 3.77 - Fixed Dropbox crash. However, this change prevents the last directory from being saved to dropbox. - The Bluetooth pedal will move one PDF page. - The Bluetooth pedal will follow the scrolling number of PDFs. For more information see Version 3.76 - Fixed transposition issues. - Zoom in and out are set as default in preferences. - Improved guitar search shows correct text loading. - PDF files correspond to scrolling in Bluetooth pedal preferences. More info: Version 3.59, Text formatting issues fixed. Removed search bar from metronome view. Added capo chord marker for. Added faster autoscroll speed. More information about updates: Several fixes and updates.
