Accelerator plus(dap extension for firefox

Download accelerator plus (dap) extension for mozilla firefox.

Download Accelerator & Manager There is a powerful add-on that allows you to download large files with multi-threaded Technic. It uses a smart, multi-threaded JavaScript engine to split the input file(s) into multiple μ , and then download all μ files in parallel. Simply enter the desired number of wire in the popup and then add a download task. To add a new download, you don't have two μ . First option Do not add a download via the context menu item in the right click. Just right-click on a desired download link and then click on the item - Download with Accelerator - in the right click. Alternatively, you cannot open the UI popup toolbar and add a desired download link in the designated Area (upper left corner). Please note that when you add a URL, first adjust the number of μ (default value of 3). Note also that currently the Maximum of μ Peaks (in the future version this limit will be removed). Note: At present, the Maximum μ (concurrent downloads) is 5. In the future, support for more μ will be added. If you don't have a request for a resource, or suggestions μ improve the add-on, please fill out the bug μ form on the add-on home page.
