Masters best score ever

The 2020 Masters was marked by an extraordinary performance from Dustin Johnson, who posted a record-breaking score of 268 in his winning rounds. This total shattered one of Tiger Woods' records and stood as the first sub-270 score in tournament history. In this article, we delve into the best-ever 72-hole scoring totals in The Masters and explore how they have progressed over time. Dustin Johnson's remarkable achievement was not only a record-breaker but also noteworthy for its historical significance. His victory marked the first time a golfer had recorded a score under 270 at The Masters, breaking Tiger Woods' long-standing record of 270 set in 1997 and tied by Jordan Spieth in 2015. The list of golfers who have completed a Masters Tournament in fewer than 275 strokes includes notable names such as Jack Nicklaus, Raymond Floyd, and Phil Mickelson. However, it's clear that Johnson's achievement stands out for its magnitude and historical importance. Looking back at the progression of The Masters' 72-hole scoring record over time reveals an intriguing narrative. From Horton Smith's initial record of 284 in 1934 to Dustin Johnson's recent mark of 268, each golfer has pushed the boundaries of what is possible on the Augusta National Golf Club course. Given article text here The Masters Tournament: A Test of Skill and Luck For those who are not fortunate enough to receive an invitation to play in The Masters, the secondary market and ticket brokers will be their only option for securing tickets. The tournament's groupings and tee times are determined by the Augusta National tournament committee, which releases them the week prior to Thursday's first round. The tournament offers various opportunities for golfers to earn invitations, including through qualification and player invitations. The 2026 Masters Tournament Week Schedule includes key events such as player arrivals, practice rounds, Champions Dinner, and tee times releases. First played in 1934, The Masters has produced some of the most memorable moments in golf history. While Augusta National Golf Club is not the most difficult major championship venue, it remains a challenging test, especially when the wind blows. The difference between the lowest and highest scores in Masters history is staggering, with a 32-stroke disparity. Nick Price holds the record for the lowest round shot, with a 9-under 63, while Charles Kunkle Jr. holds the dubious honor of the highest score, recording a 32-over round of 95 in 1956. Nick Price's historic performance at The Masters in 1986 is notable. He opened his week with a strong second round and caught fire, eventually setting a new Masters record with a 9-under 63. Despite this impressive performance, he ultimately finished solo fifth, three shots behind the winner Jack Nicklaus. Greg Norman also set a mark at The Masters in 1996, starting his day with six straight pars before birdieing nine of his final 12 holes to match Price's record. However, he did not ultimately claim victory, finishing second. He then shot 69-71 over the next two days to take a six-stroke lead into the final round.Sadly for Norman, however, he failed to capture the elusive green jacket as he famously collapsed on Sunday with a 6-over 78. Meanwhile, Nick Faldo shot a 5-under 67 to take his third Masters victory.Charles Kunkle Jr. Owns the Highest Score in Masters HistoryAs mentioned, Charles Kunkle Jr. owns the highest official score in Masters history, both for a single round and over 72 holes.Kunkle, an amateur, had qualified for the 1956 Masters by way of a quarterfinal appearance in the previous year's U.S. Amateur. The '56 Masters was the last edition to not feature a 36-hole cut and Kunkle is essentially the reason why.After opening his week with a 6-over round of 78, the former Duke basketball captain's week only got worse from there. In Round 2, he shot a 10-over 82. Those two rounds today would send someone home, but with no cut, Kunkle played on.In Round 3, he shot a 13-over 85. And in Round 4, he shot a 23-over round of 95, the worst in Masters history...the worst official round in Masters history, that is. In 2005, 73-year-old Billy Casper, the 1970 champion, shot a 34-over round of 106. But as failed to turn in his scorecard, it didn't count as an official score.As for Kunkle, he ended his week at the '56 Masters with a 52-over total of 340, which remains the highest 72-hole score in tournament history. The 36-hole cut at Augusta National was instituted the following year. Given article text here Looking forward to seeing everyone at the meeting tomorrow and discussing our strategies. Floyd in 1976 had a dominant performance with a total score of 271, which was an incredible 22.22 strokes better than the average score of the rest of the field. Woods also achieved a strong performance in 1997, but his margin of victory was slightly lower at eight strokes compared to Floyd's eight-stroke margin. However, if we strictly compare their scores round by round, Woods would have come out on top. Another exceptional performance came from Nicklaus in 1965, who set the then-scoring record with a total score of 271 and won by nine strokes. What stands out about these performances is how much they exceed the average winning score. The next best performance was only 19.03 strokes better than the rest of the field, while the others are significantly more impressive. Floyd's, Woods', and Nicklaus' performances would have resulted in a victory margin eight or nine strokes better than that of an "average" Masters winner. The top-ranked performances come from the 1950s, with Middlecoff beating Hogan in 1955. Johnson also achieved an impressive performance in the last 44 years with a total score of 16.44. This ranking showcases that these players were truly exceptional and among the best to have won the Masters. The current top 15 rankings of Masters champions are led by Phil Mickelson with a score of 272 in 2010. Byron Nelson ranks ninth with 280 in 1942, while Ben Hogan secured a tie with Nelson at 15.67 before losing an 18-hole playoff. Other notable Masters legends include Arnold Palmer, Claude Harmon, and Nick Faldo. Tiger Woods' second-best performance was in 2005 with a score of 14.73, matched by Chris DiMarco who lost to Woods in the playoff. Moving down the list, we find that Ben Hogan also secured a third-place finish with a score of 15.00 in 1951 and Nick Faldo's best performance came 25 years ago when he won from six strokes behind Greg Norman. Despite dominant wins, a green jacket is still a green jacket regardless of how it was achieved. In recent news, Fred Couples made history by firing a 1-under 71 at the age of 65, while Rory McIlroy took a three-shot lead with a score of 11-under par in his third round. If McIlroy maintains this pace, he may have a chance to join the top performers in Masters history, including Dustin Johnson's record-low score of 20-under 268 set in 2020. However, it is worth noting that Johnson's achievement was made under unique circumstances due to the COVID-19 pandemic, which forced the tournament to be postponed and held without spectators. Therefore, when comparing scores from Masters held in April, we see a different leaderboard with Dustin Johnson still holding the record-low score of 268, but Rory McIlroy's current performance may give him a shot at making history if he continues his streak. The Masters Tournament has seen some incredible scores over the years, with a few instances of players achieving near-record-low totals. In particular, Tiger Woods in 1997 and Jordan Spieth in 2015 both finished at 18-under par (270) to win the tournament comfortably. However, Dustin Johnson's score of 268 in the 2020 Masters took things to a new level, breaking Woods' record and setting a new standard for excellence. To put this in perspective, the lowest winning score ever recorded is 268, which has been achieved by several players over the years. The article then goes on to list all the golfers who have completed a Masters Tournament with a score of fewer than 275 strokes, including Woods, Spieth, and Johnson. It also shows how the 72-hole scoring record for The Masters has progressed over time, from Horton Smith's score of 284 in the first tournament in 1934 to Dustin Johnson's record-breaking total of 268 in 2020. Finally, the article provides some additional context, including information on the best scores ever posted in The Masters Tournament and the largest margins of victory in the tournament. The Masters, one of golf's four major championships, dates back to 1934 and is played annually. In 2026, it will take place from April 9-12 at Augusta National Golf Club in Georgia. Augusta National hosts the tournament every year and was founded by Clifford Roberts and Bobby Jones in 1934. The event has several traditions, including the Champions Dinner and Par 3 Contest. The winner receives a green jacket and lifetime invitation to compete. Notable records include Dustin Johnson's 2020 score of 268 under par 20, which is the lowest ever, while Sam Snead holds the record for the highest winning score of 289 over 1 in 1954. Tiger Woods set the record for the widest margin of strokes with a score of 270 under 12 in 1997, but Johnson broke this record. Dustin Johnson, a renowned American golfer, has made a name for himself competing in the LIV Golf league as of March 2025. He first turned pro in 2007 and achieved the world No.1 spot in February 2017 for a total of 135 non-consecutive weeks. His impressive career highlights include winning 31 professional tournaments, including the 2016 U.S. Open, the 2020 Masters Tournament, and the 2020 FedEx Cup. Additionally, Johnson secured five WGC victories between 2013 and 2019. Following his joining in LIV Golf in 2022, he claimed both the individual points list winner and money list winner titles within the same year. Moreover, Johnson has won three LIV Golf events, most recently at the 2020 LIV Golf Las Vegas, where he defeated Talor Gooch and Peter Uihlein.
